Date Time Addition

**Date Time Addition** 

**Step 1:** Go to Manage Forms > Triggers > Add Triggers > Select Action Type and choose 'Set current event values'

	Triggers
toTime({dateTimeField})>toTime('23/10/2018 15:12:18')	· · · · · · · · · · · · · · · · · · ·
Compare Listbox '(field1_label)'=='Test' '(fieldname_label)'=='item 1'	0
Action Type 1 *:	· ·
Action Schedule 1: Examples New Schedule (dateTimeField) 2010-10-23 15:12:18 23/10/2018 15:12:18 22/09/2018 05:15 AM Reschedule R>(dateTimeField) R>2016-10-23 15:12:18 R>23/10/2018 15:12:18 R>23/10/2018 15:12:18 R>23/10/2018 15:12:18 R>23/10/2018 15:12:18 R>23/10/2018 15:12:18 R>23/10/2018 15:12:18 R>23/10/2018 15:12:18 R>25/15 AM	Send email (test)@domain.com;test2@domain.com;test3@domain.com###email text###subject###sender name) Send SMS 1 (+987654321;+12345678###sms text) http request (http://URU/path/?fieldA=(field1)&field=[field5]) run MySQL command (hostname###username###password###insert into dbname tablename (field) values ('{field}')) run MSSQL command (server###username###password###insert into dbname tablename (field) values ('{field}')) run Oracle command (connectionstring###username###password###insert into dbname tablename (field) values ('{field}')) run Oracle command (connectionstring###username###password###insert into dbname.tablename (field) values ('{field}')) send SMS 2, Rapidsms (+987654321;+12345678###sms text###accessKey###accessSecret###From) Send Notification 1 (test1@domain.com###notification text) Send Vouchermatic request (+987654321;+12345678) Auto Lordete envircenced (formID=55 field1=24,field2={field15}) Auto Lordete envircence (formID=5 field1=24,field2={field15})
Action 1:	Auto Delete existing record (romID=5, field3=12) Copy record to form (formID=5) Move record to form (formID=5) Auto Delete all records (formID=5) Delete Current Record (ves) Set ourrent went veloce (field1=(field3):field4=(field6):field6=(strippyplus))
	Set current event values ( neid = {neid 3, neid = {neid3}, neid = {neid3}, neid = stringvalue) Run globar ingger (ingger D==5) Show Popup (Dialog content)

Step 2: We can use the below value.

field1=calcTime('+7 day')

You can replace '+7 day' with other values.

'+13 minute''+11 month''+11 hour''+7 year'
