

FAQ

FAQs

What is JET Workflow?

JET is developed to help your organization simply and effectively create web and mobile applications without the need for expensive and time-consuming code-based programming.

What devices are compatible with JET Workflow?

JET Workflow is compatible with all Apple, Android, and Windows devices.

Who is Jet Workflow for?

The people who get the most out of Jet Workflow are business executives like department heads, senior managers, and process owners who want to automate repetitive processes. Applications can also be created without any coding so that all the users in the organization can utilize them through our web application and mobile apps.

What does JET stand for?

JET stands for (J)ust-In-Time (E)nterprise (T)ool.

What kinds of business applications do people usually set up?

Jet comes with over 20 pre-built applications for the most common apps. Some of these are: Order Forms, Feedback Form, Expense Management and Work Schedule
